Abstract

Write your abstract here (about 150–250 words summarizing the problem, solution, and outcomes).

1 Introduction

1.1 Project Background

Describe your project background here.

1.2 Existing Solutions / Similar Applications

Compare at least three existing applications or systems. Discuss their strengths and limitations.

2 Problem Statements

Clearly define the main problems your project will address.

3 Project Objectives

List your project’s specific, measurable, and achievable objectives.

4 Motivation

Explain why this project matters — what drives your team to do it?

5 Proposed Solution

5.1 Description of the Proposed Project

Explain your system or solution conceptually.

5.2 Techniques / Methods / Algorithms

Describe the methods, tools, or algorithms you will use.

6 SDG Alignment

Explain which Sustainable Development Goal(s) your project contributes to.

7 Significance of Project

Discuss the potential benefits and impact (social, environmental, or economic).

8 Uniqueness of Proposed Solution

Explain how your project is different or innovative.

9 Expected Outcomes

Describe the deliverables or outcomes you plan to achieve.

10 Status of the Project

State whether it's a new or continuing project and current progress.

11 References

Use APA or IEEE style for your references. For example:

- APA Style Guide: <https://apastyle.apa.org/style-grammar-guidelines/references/examples#textual-works>
- IEEE Style Guide: <https://www.scribbr.com/category/ieee/>

12 Appendix

12.1 Proposed System Architecture

Figure 1: Overall system architecture (replace with your diagram).

12.2 Proposed Overall Modules Diagram

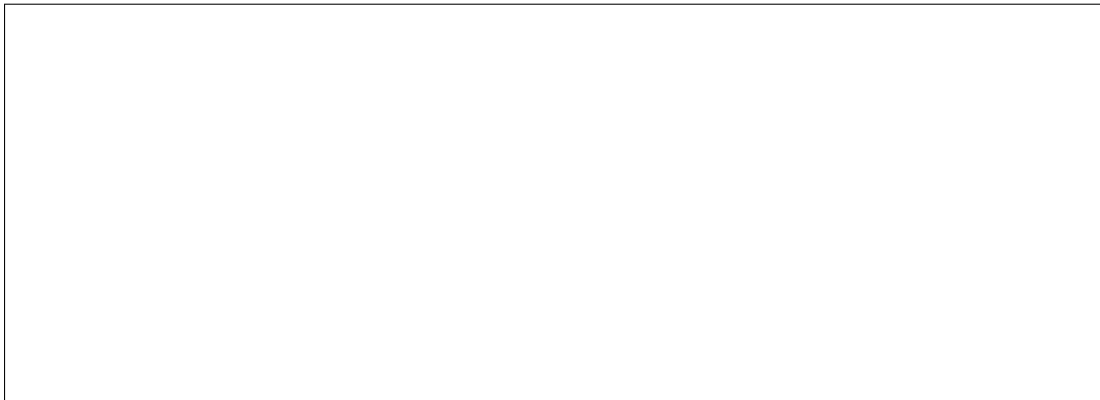

Figure 2: Modules diagram / flowchart (replace with your diagram).
