

CAT 304: Final Presentation Guidelines 2025/2026

1. The presentation will be held face to face based on the timetable given by the coordinator.
2. Each session will be given 30 minutes.
 - 5 minutes preparation + 5 minutes presentation + 10 minutes project demo + 10 minutes Q&A.
3. Students should use their own notebook for the purpose of presentation.
 - Students MUST share their computer screen/slide presentation during the Presentation session
4. Students must prepare slides presentations to explain the project. Slides should at least include the following:
 - I. First Slide: Project title, project code, Group No., Student's name & email, Supervisor
 - II. Outlines of your presentation
 - III. Background of your project
 - IV. Problem statements + proposed solution + which SDG is chosen.
 - V. User(s) of the proposed solution
 - VI. Objectives of the project
 - VII. Requirements of your project: users and system requirements
 - VIII. Existing Solutions and Techniques
 - IX. Details of the proposed solution:
 - a. Overall Module diagram – (highlight which modules belong to each team member)
 - b. System Architecture diagram – describe of how your system works.
 - c. Selected techniques/algorithms or approach used (*if available*)
 - d. Process flow/algorithm design for the selected process/database design/ interface design or etc. (*if available*)
 - X. Technology deployed: Software/tool + hardware
 - XI. Outcomes of your project
 - XII. Conclusion
5. All team members must present the project during the project demo. Each team member must demonstrate his/her modules.
6. 10 minutes for Q & A. ** Supervisor or examiners have right to ask you during your presentation.
